<b>ID:</b>	AB-190518
<b>Company name:</b>	Bramcke Hungary Kft.
<b>Company address:</b>	Kisatár utca 17., 4031 Debrecen

QR code:

Date of issue: 2024-09-10

Page: 1/3

### SPECIFICATIONS

EAN code:	5999562285787
Warranty:	3year(s)
Socket:	E14
Working temperature:	-20 - +40 °C
Packaging:	1/b 100/c 6300/p
Certifications:	CE

### TECHNICAL DETAILS

Wattage:	4W
Voltage:	220-240V
Beam angle:	360°
Dimmability:	No
Lumen output:	480lm
Color temperature:	4 000K
Lifetime:	15 000h
Energy class:	E
Type of LED:	Filament
CRI:	80
IP standard:	IP20

### BOX PICTURE

**Avide LED Filament Mini Globe 4W E14 NW 4000K**

**Product code:** ABLFMG14NW-4W  
**Brand link:** [avidelighting.com/qr/ABLFMG14NW-4W](https://avidelighting.com/qr/ABLFMG14NW-4W)  
**ID:** AB-190518  
**Company name:** Bramcke Hungary Kft.  
**Company address:** Kishatár utca 17., 4031 Debrecen

**Date of issue:** 2024-09-10  
**Page:** 2/3

**PRODUCT SIZE**

Diameter: 45mm  
 Height: 78mm

**CARDBOARD BOX**

EAN: 5999562285787  
 Packaging: 1/b 100/c 6300/p  
 Dimensions: 48mm x 114mm x 48mm  
 Net weight: 20g  
 Gross weight: 28g

**CARTON**

EAN: 5999562285794  
 Packaging: 1/b 100/c 6300/p  
 Dimensions: 510mm x 200mm x 260mm  
 Net weight: 2kg  
 Gross weight: 2.8kg

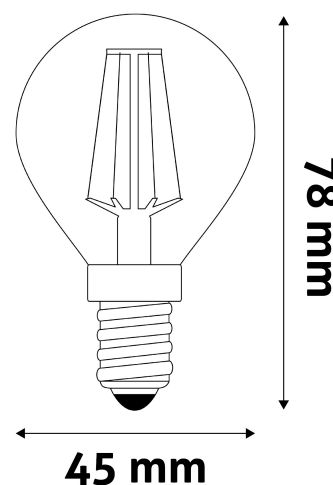

**PALLET EXAMPLE**

Height: 182cm  
 Width: 120cm (std Euro pallet)  
 Depth: 80cm (std Euro pallet)  
 Cartons per pallet: 63carton/pallet  
 Cartons per row: 9pcs  
 Net weight: 126kg  
 Gross weight: 176.4kg

### PRODUCT DESCRIPTION

The LED filament products are professionally-designed light sources that can be used to effectively replace traditional light bulbs in most lighting environments.

This vertical line arrangement not only provides high brightness but can also produce a 360 ° projection angle. The advantages of LED lights are clearly visible here, their heat dissipation is low, thus they do not produce unnecessary heat energy, they emit light with maximum efficiency and thus can also be used at places where heating might represent a hazard.

Placement within the lamp shade or higher is the adequate choice for a transparent product. In the case of a transparent product, avoid direct lighting and at such places use types with an opaline shade instead, which provides a pleasant homogeneous light and does not dazzle the eyes.

As opposed to traditional LED technology, in the case of filament products the chips are placed on transparent columns separated from each other and are then covered with phosphorus. This is called COG or Chip on Glass technology. This procedure enables the replacement of traditional light bulbs both aesthetically and in terms of size. They do not flash, sparing they eyes this way. Switching them on and off does not shorten their service life. As they do not contain a filament per se, vibration or shock does not necessarily result in the failure of the light source.

LED lights do not emit light by heating up a metal filament but by means of electrons, thus they have a minimal heat loss. You can save up to 80% energy compared to traditional light bulbs when using LED technology. LED lights produce minimal heat, thus they can also be used at places where heating might represent a hazard.
